Weekly **MORBIDITY REPORT**

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

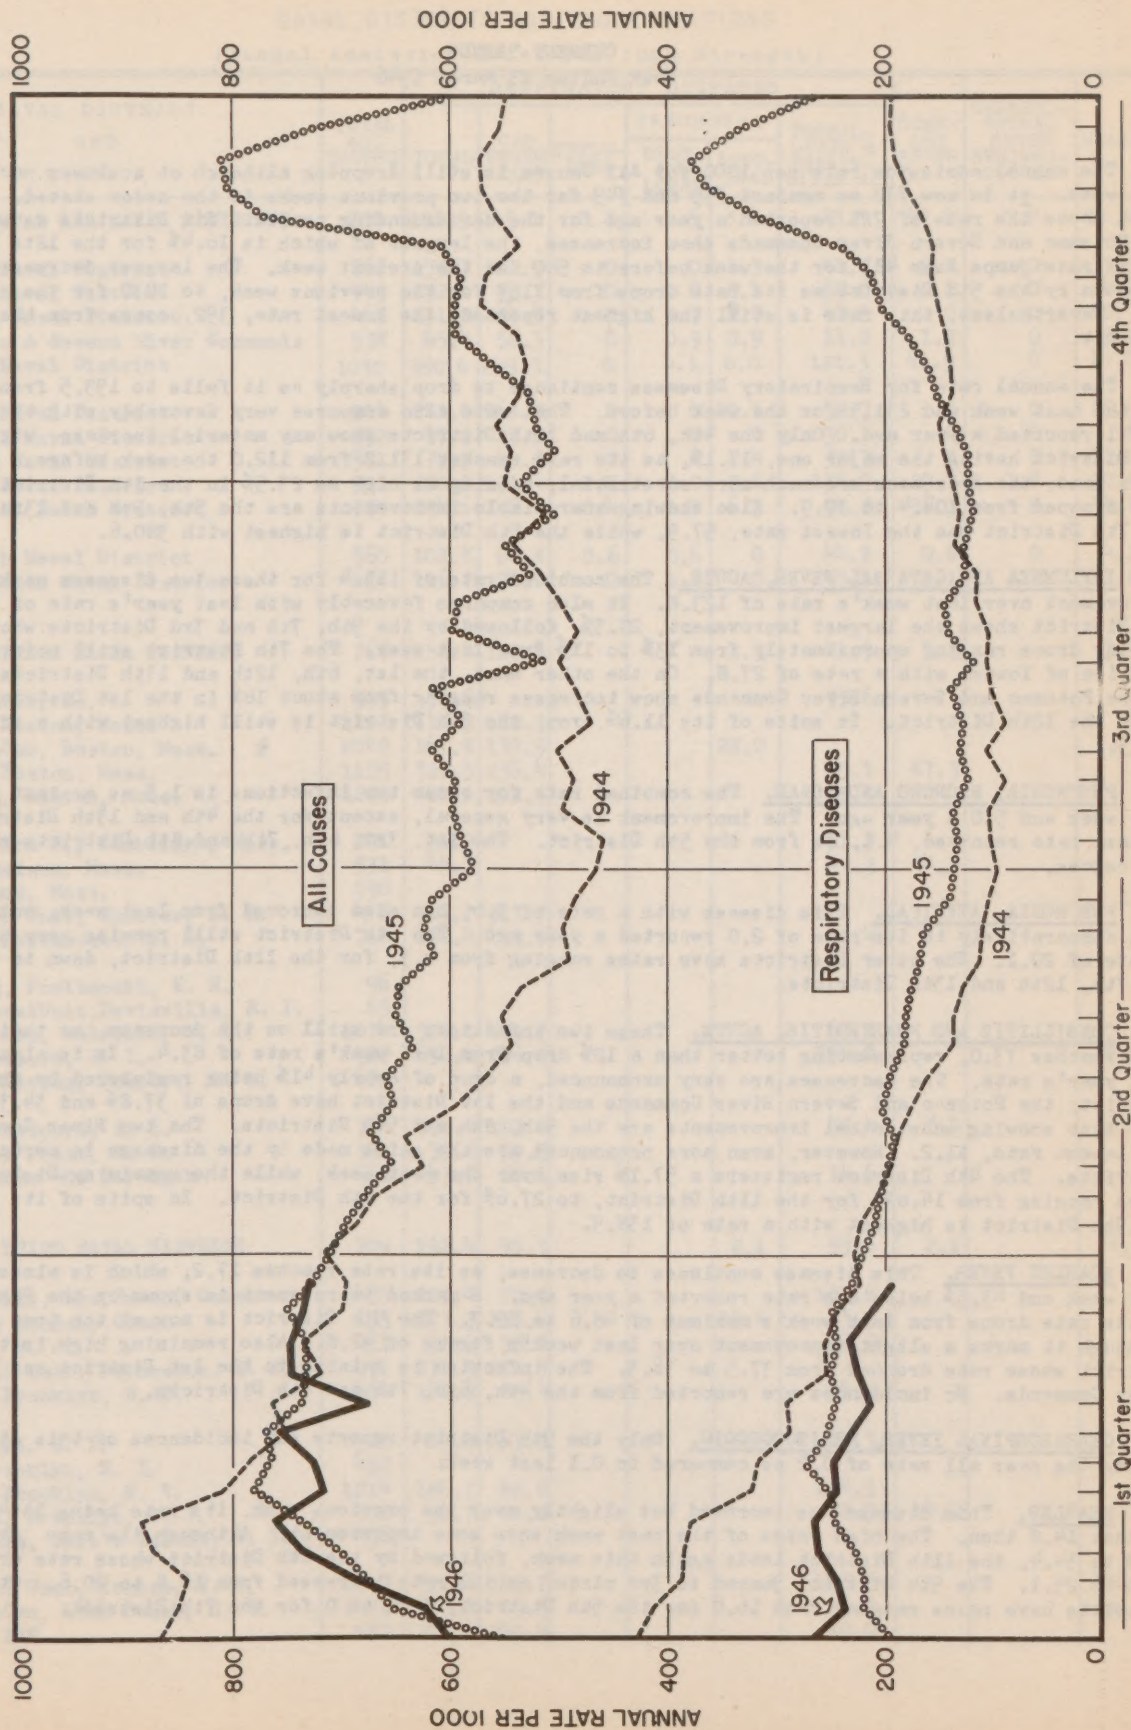

WEEK ENDING 23 MARCH 19 46

REPORT NO. 221

RESTRICTED — THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

WEEKLY MORBIDITY REPORT

RESTRICTED

CURRENT TRENDS
Week Ending 23 March 1946

The annual admission rate per 1000 for All Causes is still dropping although at a slower pace than last week. It is now 730 as against 735 and 749 for the two previous weeks in the order stated. It is still above the rate of 721 reported a year ago for the corresponding period. Six Districts as well as the Potomac and Severn River Commands show increases, the largest of which is 16.4% for the 12th District, as its rate jumps from 481 for the week before to 560 for the present week. The largest decrease 10.7% is shown by the 5th District as its rate drops from 1153 for the previous week, to 1030 for the present one. Nevertheless, this rate is still the highest reported; the lowest rate, 392, comes from the 7th District.

The annual rate for Respiratory Diseases continues to drop sharply as it falls to 193.5 from 213.9 for the past week and 231.5 for the week before. That rate also compares very favorably with the one of 231 reported a year ago. Only the 4th, 6th and 12th Districts show any material increase, with the 4th District having the major one, 17.1%, as its rate reaches 131.2 from 112.0 the week before. On the other hand, the decreases are much more substantial, running as high as 23.5% in the 8th District, whose rate dropped from 104.4 to 79.9. Also showing appreciable improvements are the 5th, 9th and 13th Districts. The 7th District has the lowest rate, 57.9, while the 5th District is highest with 380.6.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The combined rate of 115.4 for these two diseases marks a further improvement over last week's rate of 123.8. It also compares favorably with last year's rate of 144.2. The 8th District shows the largest improvement, 28.3%, followed by the 9th, 7th and 3rd Districts whose rates display drops ranging approximately from 13% to 11% from last week. The 7th District still maintains its position of lowest with a rate of 27.8. On the other hand, the 1st, 6th, 12th and 13th Districts as well as the Potomac and Severn River Commands show increases ranging from about 16% in the 1st District down to 3% in the 12th District. In spite of its 11.6% drop, the 5th District is still highest with a rate of 249.3.

PNEUMONIA, BRONCHO AND LOBAR. The combined rate for these two infections is 1.5 as against 2.3 for the past week and 5.0 a year ago. The improvement is very general, except for the 4th and 13th Districts. The highest rate reported, 4.1, is from the 5th District. The 1st, 3rd, 6th, 7th and 8th Districts report no incidences.

PNEUMONIA, ATYPICAL. This disease with a rate of 3.6, has also improved from last week, but remains high comparatively to its rate of 2.0 reported a year ago. The 6th District still remains very high with a rate of 20.1. The other Districts have rates ranging from 6.3, for the 11th District, down to 0 for the 7th, 12th and 13th Districts.

TONSILLITIS AND PHARYNGITIS, ACUTE. These two infections are still on the decrease, as their combined rate reaches 73.0, representing better than a 12% drop from last week's rate of 83.4. It is almost 9% below last year's rate. The decreases are very pronounced, a drop of nearly 41% being registered by the 13th District; the Potomac and Severn River Commands and the 1st District have drops of 37.8% and 34.3% respectively. Also showing substantial improvements are the 5th, 8th and 9th Districts. The two River Commands have the lowest rate, 11.2. However, even more pronounced are the gains made by the diseases in certain Naval Districts. The 4th District registers a 57.1% rise over the past week, while the remaining Districts have rises ranging from 14.6%, for the 11th District, to 27.6% for the 6th District. In spite of its improvement the 9th District is highest with a rate of 138.9.

SCARLET FEVER. This disease continues to decrease, as its rate reaches 17.2, which is almost 11% below last week and 43.5% below the rate reported a year ago. A marked improvement is shown by the 9th District, as its rate drops from last week's maximum of 48.6 to 29.7. The 5th District is now at the top, with 41.9, although it marks a slight improvement over last week's figure of 42.8. Also remaining high is the 11th District whose rate dropped from 37.5 to 36.3. The infection is gaining in the 1st District and the two River Commands. No incidences are reported from the 4th, 6th, 7th and 8th Districts.

CEREBROSPINAL FEVER, MENINGOCOCCIC. Only the 9th District reports any incidences of this disease, making the over all rate of 0.2 as compared to 0.1 last week.

MEASLES. This disease has improved but slightly over the previous week, its rate being 14.4 now as against 14.8 then. The high rates of the past week show some improvement. Although its rate dropped from 40.9 to 34.4, the 11th District leads again this week, followed by the 6th District whose rate dropped from 31.0 to 25.1. The 9th District jumped to 3rd place, as its rate increased from 16.8 to 20.6. Other Districts have rates ranging from 16.0 for the 5th District, down to 0 for the 7th District.
